From Challenge to Opportunity

Wave 2 of the East Asia Retirement Survey

Richard Jackson

Hong Kong
September 4, 2015

Gap.GlobalAgingInstitute.org
The East Asia Retirement Survey is now in its second wave. The first wave was conducted in 2011 in China, Hong Kong SAR, Malaysia, Singapore, South Korea, and Taiwan. The second wave was conducted in 2014 in the six first-wave countries plus Indonesia, the Philippines, Thailand, and Vietnam.

The survey is nationally representative, except that the samples for China, Indonesia, the Philippines, Thailand, and Vietnam were limited to urban areas.

The survey universe consists of “main earners” aged 20 and over, including both current main earners and retired main earners.

Respondents were asked about their general attitudes toward retirement, as well as about their own retirement experience and expectations.

Current retirees were asked about their current retirement experience, while current workers were asked about their retirement expectations.
Although the ten countries surveyed differ in important respects, they also have important things in common.

- There are enormous differences in per capita income, institutional capacity, degree of market orientation, and extent of population aging across the ten countries surveyed.

- Yet all of the countries have in common large informal sectors and underdeveloped welfare states. In all of the countries, moreover, the extended family continues to play a far more important role in retirement security than it does in the West.
The Future of Retirement in East Asia
By overwhelming majorities, East Asians reject the traditional model of family-centered retirement security.

"Who, ideally, should be mostly responsible for providing income to retired people?" and "Who, ideally, should be mostly responsible for providing personal care to retired people?"

Share of Respondents Saying "Grown Children or Other Family Members"
Looking to the future, today’s workers expect to be less dependent on the family than today’s retirees are.

Share of Today's Retirees Who Are and Share of Today's Workers Who Expect to Be Financially Dependent on Their Grown Children

Views differ greatly across East Asia about who should replace the family as guarantor of retirement security.

"Who, ideally, should be mostly responsible for providing income to retired people?"

Share of Respondents Saying “Retirees Themselves, through Their Own Savings” versus Share Saying “Government”
For today’s retirees in much of East Asia, retirement can be a time of economic and social marginalization.

- China: 26% (More Income), 14% (A Lot Less Income)
- Vietnam: 8% (More Income), 14% (A Lot Less Income)
- Indonesia: 5% (More Income), 15% (A Lot Less Income)
- Malaysia: 18% (More Income), 29% (A Lot Less Income)
- Thailand: 2% (More Income), 33% (A Lot Less Income)
- Singapore: 6% (More Income), 43% (A Lot Less Income)
- Philippines: 7% (More Income), 45% (A Lot Less Income)
- Taiwan: 2% (More Income), 47% (A Lot Less Income)
- Hong Kong: 4% (More Income), 61% (A Lot Less Income)
- South Korea: 4% (More Income), 69% (A Lot Less Income)
With rates of state pension receipt due to rise in most countries, the outlook for today’s workers is improving.

Share of Today's Retirees Receiving and Share of Today's Workers Expecting to Receive Income from the State Pension System

- **Indonesia**: 60% (Today's Retirees) 45% (Today's Workers)
- **Vietnam**: 68% (Today's Retirees) 49% (Today's Workers)
- **Thailand**: 61% 59%
- **Taiwan**: 68% 44%
- **Philippines**: 68% 55%
- **South Korea**: 54% 55%
- **Malaysia**: 86% 79%
- **Singapore**: 89% 89%
- **Hong Kong**: 91% 55%
- **China**: 83% 95%

GAI Global Aging Institute
Rates of asset income receipt are also due to rise, though vast differences in market-orientation will persist across East Asia.

* Includes insurance and annuity policies and stocks, bonds, and mutual funds, but excludes bank deposits.
Today’s workers expect to work longer than today’s retirees did, which should also improve their retirement prospects.

Share of Today's Retirees Who Retired at Age 60 or Later and Share of Today's Workers Expecting to Retire at Age 60 or Later

* Includes workers who never intend to retire.
Despite the positive trends, today's workers remain extremely anxious about their retirement security.
Three Reasons for Workers’ Retirement Insecurity

- Although pension receipt rates are rising in most countries, replacement rates are generally low.
- In countries with pay-as-you-go state pension systems, workers are concerned about the security of government benefit promises.
- Most workers are not saving enough for retirement on their own to make up for the likely gap in pension income.

### Average Net Financial Asset-to-Income Ratio of Survey Respondents at Age 50*

* Includes all classes of household financial assets; ratios are averages for respondents aged 45-54.
In addition to their own retirement security, respondents in faster-aging countries worry about the growing burden of supporting the elderly on tomorrow’s workers and taxpayers.

Share of Respondents Agreeing and Disagreeing That "Supporting the Growing Number of Elderly Will Be a Large Burden for Tomorrow’s Workers and Taxpayers"

Note: The question used a five-point scale, with 1 being strongly disagree and 5 being strongly agree. "Agree" = 4 + 5 and "Disagree" = 1 + 2.
Respondents in faster-aging countries also worry about the growing burden on tomorrow’s families.

Note: The question used a five-point scale, with 1 being strongly disagree and 5 being strongly agree. "Agree" = 4 + 5 and "Disagree" = 1 + 2.
Strategic Implications
Directions for Reform

- Improve the adequacy of state pension systems
- Encourage or require workers to save more for their own retirement
- Establish more robust floors of old-age poverty protection
- Raise retirement ages and encourage longer work lives
There is widespread demand for translating lump-sum pension payments into retirement income streams.

“If you could choose how pension benefits will be paid to you, please indicate which of the following ways you would prefer to receive the benefits.”

Share of Today's Workers Saying “All in Regular Monthly Payments” versus Share Saying “All in a Single Lump Sum”
Directions for Reform

- Improve the adequacy of state pension systems
- Encourage or require workers to save more for their own retirement
- Establish more robust floors of old-age poverty protection
- Raise retirement ages and encourage longer work lives
Directions for Reform

- Improve the adequacy of state pension systems
- Encourage or require workers to save more for their own retirement
- Establish more robust floors of old-age poverty protection
- Raise retirement ages and encourage longer work lives

Share of Respondents Saying Government “Should Increase Taxes to Provide a Basic Pension Benefit to Those Elderly Who Are in Financial Need”

- Vietnam: 27%
- Indonesia: 32%
- Philippines: 43%
- Singapore: 60%
- Malaysia: 61%
- Thailand: 67%
- Hong Kong: 69%
- Taiwan: 72%
- China: 74%
- South Korea: 75%
Directions for Reform

- Improve the adequacy of state pension systems
- Encourage or require workers to save more for their own retirement
- Establish more robust floors of old-age poverty protection
- **Raise retirement ages and encourage longer work lives**

![Share of Respondents Saying Government Should Raise the Retirement Age](chart)

- Philippines: 23%
